VIRGINIA APPLE PROCESSORS REPORT FOR 1950

Processors in Virginia and other States report the purchase of 6,848,000 bushels of Virginia apples from the 1950 crop, which is 54 percent of the production of 12,580,000 bushels in commercial counties.

Virginia plants used 6,699,000 bushels of apples from the 1950 crop, of which 6,335,000 bushels or 95 percent were produced in Virginia. Virginia growers received \$5,969,050 for the apples sold to processors in the State. The average price was \$1.96 per hundred pounds compared with \$1.51 per hundred pounds for the 1949 crop.

The following table shows the quantity of Virginia apples purchased by processors, the quantity used by Virginia processors for various products, and the prices paid for the years 1940 to 1950. The column headed "other" includes apples used for evaporating, brandy and wine, freezing, juice, mince meat, concentrates, and pectin.
